I am an Information Technology student at Chinhoyi University of Technology and an IT intern at Prevsol Digital. I am passionate about building software that solves real problems for the people around me, especially with AI, data and mobile technology, and I enjoy learning new tools, competing in hackathons and turning ideas into working products. I work well in teams, communicate clearly and take ownership from requirements to deployment. See my work at portfolio.hollandsck.site.

EXPERIENCE

SEP 2026 – PRESENT

IT INTERN, PREVSOL DIGITAL

Industrial attachment, also supporting sister company Feltach Contracting

- Gather requirements, then build and test applications, databases and integrations; support deployment and write documentation.
- Run IT procurement: source suppliers locally and in the UAE, compare quotations against ICT specifications and prepare tender submissions.
- Turn business data into analysis that guides decisions, and support partnership talks with mining companies, organisations and NGOs.

JUN 2026 – JUL 2026

DEVELOPER & DESIGNER, CODICO SOFTWARE SOLUTIONS

Remote contract | Front-end development, Figma UI concepts and branded design work

PROJECTS

OCT 2026

ADAPTIVE ANTENNA INTELLIGENCE, NETONE

NESARI 2026, Topic 2 | Team GreenHex | Python, Flask, JavaScript, Arduino

- Built an explainable engine for dynamic antenna optimisation that forecasts shifting demand across 72 directions and picks safe azimuth and tilt settings.
- Added trust guardrails so it HOLDs when the forecast is unreliable (held in 39 of 40 erratic runs), plus a live dashboard, audit log and 24-hour simulation; pitched live at Great Zimbabwe University.

JUN 2026

SERVICEBRIDGE AI

USAII Global AI Hackathon 2026, final round | Next.js, TypeScript, OpenAI API, Firebase

- Built the AI logic and backend of a responsible AI navigator that classifies a person's need, checks urgency, retrieves matching services and returns next steps, document checklists and official sources. Live at servicebridge-ai.vercel.app.

MAY 2026

CARENEST MHEALTH APP

CeSHHAR MASCOT mHealth Hackathon 2026, top 5 of 20+ teams | Flutter, Dart, Firebase

- Built the backend of a cross-platform Flutter app for youth HIV and pregnancy prevention: private AI assistant, quizzes, anonymous community posts and a map of youth-friendly clinics; pitched live in Harare.

2026

HPAVS: PROPERTY AUCTION & VERIFICATION

CUT group project, graded distinction | PHP, MySQL, JavaScript, OCR

- Role-based platform where officers review OCR-read title deeds with a fraud risk score, duplicate warnings and map checks before properties go to transparent online auction. Live at hollandsck.site.

OCT 2026

MULTIBAND

Founder | Next.js, TypeScript, Tailwind CSS, Resend, Vercel

- Built and deployed multiband.vercel.app, a portfolio and service-booking platform for an 11-member tech collective.

2026

ZAFM CHURCH MANAGEMENT SYSTEM

Client project | PHP, MySQL, JavaScript

- Web system for member records, departments, events and announcements; prototype accepted by a local branch and moving to deployment.

EDUCATION

AUG 2024 – 2028

BSC (HONS) INFORMATION TECHNOLOGY, CHINHOYI UNIVERSITY OF TECHNOLOGY
